

Bristlecone is an **Industry leader**

in helping clients maximize the strategic value of their supply chain.

Bristlecone had developed a proven solution to solve the master data management problem through our unique approach involving Enrichment, Transformation and Optimization phases.

Bristlecone consultants have an in-depth understanding and knowledge of the SAP MDM solution.

Data Management and Integrity Services

Successful and growing enterprises are built on accurate information to ensure that the right decisions are made at the right time. Having well organized and quality data is a business critical asset for enterprises. However, most enterprises face tremendous challenges in establishing well defined processes and procedures to obtain accurate data about their suppliers, customers, products etc. Although many technologies provide a means to capture data and provide business solutions from that data, most solutions assume that the underlying data is accurate – which is not the case in most enterprises. More often than not, enterprise data has inconsistencies, redundancies and differing and non standard representations, leading to uneven and localized management and even incorrect decisions.

Expertise in Data Management

Bristlecone had developed a proven solution to solve this problem through our unique approach involving Enrichment, Transformation and Optimization phases. We also understand that master data management is not a one time project, but is a continuous process. As a result, we have created an optional outsourced managed service delivery model. Using this service, clients can continue to enjoy accurate master data within their environment.

We also understand that master data management is not a one time project, but is a continuous process. As a result, we have created an optional outsourced managed service delivery model. Using this service, clients can continue to enjoy accurate master data within their environment.

Our SAP Expertise

Bristlecone consultants have in-depth understanding and knowledge of the SAP MDM solution. Bristlecone has implemented SAP MDM solutions for numerous clients around the world, and brings proven methodology and expertise in helping clients identify, consolidate, centralize and distribute master data objects in a consistent and harmonized manner across the enterprise.

In addition, since we are a development partner of SAP, we understand the internals of SAP very well. This enables us to design and implement customizations to support heterogeneous master data environments in the most effective manner for our clients.

Why Bristlecone?

We focus on obtaining business, not technical results. Our deployment methodology enables us to perform a rapid assessment of your supply chain environment or a fast implementation of your supply chain system.

Bristlecone is an
Industry leader

in helping clients maximize the strategic value of their supply chain.

For additional information on how we can help you with either an assessment of your master data management processes or implementation of your SAP MDM system, please contact us at sales@bccone.com or visit www.bccone.com.
