

Bristlecone is an Industry leader

in helping clients maximize the strategic value of their supply chain.

Our pre-built supply chain analytics templates, using the SCOR model, allow fast implementation of Supply Chain metrics in your environment.

Supply Chain Analytics Services

The ability to continually measure the performance of the supply chain using scorecards and metrics is absolutely critical to ensuring that the supply chain continues to be efficient, flexible and a source of competitive advantage. Effective supply chain analytics is the core foundation for this capability.

Supply Chain Analytics Expertise

With over 100 supply chain engagements to our credit, Bristlecone is uniquely positioned to help our clients define, report on, and analyze key supply chain operating metrics. Our clients have engaged us to assess their current scorecards and dashboards and recommend improvements, as well as to develop scorecards and dashboards on top of their supply chain system implementations.

Our Supply Chain Analytics assessment service leverages the industry-standard Supply Chain Operations Reference (SCOR) model. We review your current supply chain network, identify key metrics that should be used to measure its operating performance, compare it against your current scorecards and dashboards, and suggest improvements. We can also assist with the implementation of our recommendations.

“*By leveraging their knowledge of the high-tech industry ..., Bristlecone was able to quickly understand Celestica's business and technical requirements, and collaborate with our key resources to deliver ... on budget, and ahead of schedule. Their sense of commitment, ownership and accountability was excellent.*”

– Celestica

“Bristlecone's ability to quickly help solve complex problems with Nike's supply chain has strengthened our relationship with them and made them a trusted advisor for our supply chain efforts.”

– Nike

In addition, Bristlecone helps clients with the implementation of supply chain analytics on top of their SCM system implementations. We use data warehouse and reporting software solutions from a number of vendors, including SAP, to facilitate the tracking, measurement and reporting of your supply chain operating metrics. Our pre-built supply chain analytics templates using the SCOR model allow fast implementation of Supply Chain metrics in your environment.

Why Bristlecone?

We focus on obtaining business, not technical results. Our deployment methodology enables us to perform a rapid assessment of your supply chain environment or a fast implementation of your supply chain system.

Bristlecone is an
Industry leader

in helping clients maximize the strategic value of their supply chain.

For additional information on how we can help you with either an assessment of your Supply Chain analytics environment or definition/deployment of your SAP supply chain analytics, please contact us at sales@bcone.com or visit www.bcone.com.
